-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --
Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 08 July 2008.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Disposition of Claims

DETAILED ACTION

Any rejections and or objections, made in the previous Office Action, and not repeated below, are hereby withdrawn.

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 1-26 attempt to claim a method of making a glass without setting forth any steps involved in the process generally raises an issue of indefiniteness under 35 U.S.C. 112, second paragraph. Merely recites a use without any active, positive steps delimiting how this use is actually practiced. Ex parte Erlich, 3 USPQ2d 1011 (Bd. Pat. App. & Inter. 1986). Also see MPEP 2173.05(q).

The Examiner suggests changing the terms "using" and "used" in relation to the "batch redox" to either utilizing or utilized.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1-26 are rejected under 35 U.S.C. 103(a) as being unpatentable over Landa et al., U.S. Patent 7,169,722 in view of Landa et al., U.S. Patent 6,610,622.

Landa et al. '722 teach a glass composition having overlapping ranges of components with instant claims 1-26. See Abstract of Landa et al. '722 and column 2, line 50 to column 3, lines 5, and column 6, lines 13-49. Landa et al. '722 teach a glass composition having overlapping ranges of batch redox. See column 5, lines 62-65. Landa et al. '722 teach a

transmissive a* and b* having overlapping ranges as recited in claims 17, 18, and 24. See column 7, lines 35-50. Overlapping ranges have been held to establish prima facie obviousness. See MPEP 2144.05.

Landa et al. ' fail to teach that the glass contains erbium oxide in the recited amounts as claims 2, 7, and 8.

Landa et al. '622 teach glass composition similar to the composition of Landa et al. '722 which includes erbium oxide. See abstract and column 2, lines 1-50.

It would have been obvious to one of ordinary skill in the art at the time the invention was made to have a grey soda-lime silicate glass of Landa et al. '722 as suggested by Landa et al. because the resultant glass would act to physically compensate for the iron color making the glass have a neutral color

Conclusion

The additional references cited on the previous 892 have been cited as art of interest since they are considered to be cumulative to or less than the art relied upon in the rejections above.
